Subject: PC Restarting
Posted by Sk8rRIMuk on Mon, 18 Aug 2003 12:45:02 GMT

I just brought a new PC a few days back:

AMD Athlon 2600+ Processor
512Mb RAM
80Gb Hard drive
DVD ROM & DVD RW
15" TFT Monitor
NVIDIA Geforce4 MX Graphics Card

Welll my problem is when there is a game of Ren that actuallly doesnt end early due to destruction (i.e. it goes the whole 30 minutes) my PC just packs up and restarts ebfore the end.

Now no other game does this it is just Renegade .

Does anyone know anything about this?

On a side note I am also runnning a TeamSpeak server while I play.
