---

This is what I was working on and was having a bit of trouble with before, such as two corruptions and problems exporting.

I decided I wanted to try and modify the GDI Mammoth Tank, at a few things to it. What do you think of it? I don't care if you think it's completely "sh\*t" because if that's what you think, then say it.

Front

Rear

There are a few things I wasn't sure about, like the lights on the far front and rear end.
