I've been looking through P55 boards for an upcoming build which will hopefully come soon, and I want to know if anyone has had experience with the brand 'ECS' ?

Here's their P55 offering:

[http://www.newegg.com/Product/Product.aspx?Item=N82E16813135244&Tpk=ecs%20p5 5h-a](http://www.newegg.com/Product/Product.aspx?Item=N82E16813135244&Tpk=ecs%20p5%205h-a)

I'm not aiming for huge overlocks, and would likely be using an I5-750.

In enthusiast circles, the brand isn't too well regarded but I tend to find people on hardware websites to be snooty douchebags, so I'm coming here to see if anyone has some input.
