raven wrote on Sun, 27 September 2009 21:22Ah.. I've been using XCC mixer lol

I'll give that a try, thanks

Mixer has 3 columns. Pull out the middle one and navigate to where you want the files extracted to. Then navigate to always.dat or whatever and select all the files and then choose "Copy" and it'll extract them all into where you have the middle column located.
