Besides a few spin-offs and one actual exception, the various main numbered series of Final Fantasy games aren't sequels to one another. You can, for example, play Final Fantasy VI not having played the previous five, and not miss anything as far as the story goes. It's always a different story and characters. Not sure, there are staples of the series, like recurring monsters, musical themes, or throwbacks to previous games, but they're not anywhere near vital or important (more like bonuses, secrets, treats, etc.). They're not sequels to one another in that sense.
