I've kept my mouth shut till now but are you kidding me? So really what you guys did was make a few maps look pretty, copy a few of the basic infantry and some tanks and make a pretty HUD? At least I don't have to worry about you guys splitting the Ren community after hearing about this.

Let me rush out and buy my copy of UT3!!!
Atleast Renegade X actually releases something and has kept updating the community, something I can't say of projects like.. TT!
