EVGA would be OK, but their P55 LE is 169 bucks before a rebate, whereas the ECS is \$119 before a rebate which comes out to be 99 bucks. The EVGA doesn't have much over the cheaper ECS, and if I were spending 170 bucks on a board, I'd be looking at an MSI P55 GD-65.

170 dollars is starting to head into 1366 board territory, and then I'd just be tempted to then spend another 100 bucks on a 920 lol.
