Crimson wrote on Tue, 29 September 2009 17:56I \*think\* I've figured out the problem, but in order to fix the database that is (probably) causing it, I can either have a long downtime (could be up to 8 hours) or slightly slower for a couple weeks while it fixes at a low priority. I went with the latter. I'm about 1/3rd of the way through the process.

If this doesn't work, I'm going to get a new server and move all the sites on the server over one at a time until I figure out which one is causing the problems.

Alright, hope you don't run into any problems
