Okay i known where was the problem, cause most of you xp sp3 users aren't Americans or British like me and my friend. Well you have to change language in files

1 Step
Go C:\Documents and Settings\user\My Documents\My Games\Unreal Tournament 3\UTGame\Config -> UTEngine and change language to INT instead of yours.

2 Step
C:\Documents and Settings\user\My Documents\My Games\Unreal Tournament 3\Renegade\Config -> UTEngine and change language to INT.

Then create shortcut on desktop with "D:\Games\Unreal Tournament 3\Binaries\UT3.exe" -mod=..\Renegade -solomod

3 additonal step When your graphic dosent want to change after changing lang you have to reset graphic to defaults and quit and launch again game, then change graphci to what ever you want.

Then it will work for anyone, fixed problem
