"Ass in the grass"... hahahahaha... It's called "Keep Off The Grass" actually, no offense, I just found that really funny. Anyways:

1: The RenAlert "mod" you downloaded is only a beta from a few months back. The full public version is due out any day now, the team seems to be having trouble with their server. I THINK they're releasing with 4 maps, it's been a while since I checked.

2: Only other one I really know of is Reborn. They have some media out, the head of the team is taking some time off and hopes to release in a month or so. Most current news can be found here: <http://dynamic4.gamespy.com/~ammo/yabbse/index.php?board=23;action=display;threadid=1400>
