I originally was going to pull for a 60GB Vertex, but with the Intel/Thermaltake combo, it's 30 bucks less, than if I bought the Thermtaltake case and OCZ Vertex. I ain't gonna complain about that!

And I went ahead and added a 212, plus an extra fan with some Arctic Silver 5. I doubt I'll be overclocking anytime soon, but since you mentioned that it's decent for i7, I might as well grab it. All in all, the subtotal before shipping is \$1,197.

Like I said, this is still a bit tepid, but if I can swing it, this would be what I'd end up with.
