Muad Dib15 wrote on Sat, 17 October 2009 22:04weighing 200 lbs more than my 66 cuda probably helps a lot.

If by that you mean that it's so light, then yeah. It also helps that the engine is so damn powerful that you can shift from 1st to 4th (the computer actually inclines you to do so if you're not flooring it) and it runs perfectly fine.
