It can happen that you receive a error message "Error getting serverlist" and you are unable to select the server to join it.
The RenX forums seem to be down as well so don't bother going over there. They seem to have quite some problems with
the site... It is often either very very slow or it's down lol :S

Anyway, to join Slaughterhouse #1 do this:

Click the "Start (offline) Game" button and wait for the game to load.
When the game has loaded press the F10 key and type this to join Slaughterhouse #1:
open 85.25.143.169:7070

Hope to seeyou in game.
