Chew wrote on Fri, 23 October 2009 23:16: Nevermind about the skeleton file I found it, s_a_human.w3d...

Now when I try to open c_ag_gdi_locke it ask for skeleton, so I select s_a_human... then the skeleton shows up.

How do I get the the rest of what I need together and ready to export/save as the havoc?

I hate to keep asking what some may consider dumb questions, but I have been using google and searching renegadehelp.net, but I am not finding answers.

need to rebone it, quite easy tho, don't take it as a hard tut
