halo2pac wrote on Tue, 27 October 2009 16:56Sorry, I do not want to include the source yet.

That is a good suggestion. I will see if jnz, Dave, or Dante will check it. (Since I don't know stealtheye)

Also there are ways of you checking it without the need for me to have it checked.
To do this, I'd at least need to input a serial and login/pass for testing purposes and then sniff out traffic.
