Homey wrote on Thu, 29 October 2009 20:22 Yeah sorry, I consider i5 to be non 1336 socket, even though the top ends are called i7. What I meant was, the 1336 socket isn't really worth it unless you need HT. I make use of it for SMP folding on 8 threads.

Goz I'll make a list tonight for you, too little time =(

The s1156 i7's have HT aswell, so that is no argument. The only valid argument would be s1336 having triple channel + more PCI-e lanes, but that doesn't matter, as I know that gozy doesn't intend to go SLI/CF.
