Saberhawk wrote on Wed, 11 November 2009 18:24 Chrome, because it's damn fast while being largely immune to browser-wide crashes and maintains proper operating system integration. Safari might be fast and based off the same layout engine, but using MacOS X widgets and font rendering under Windows is retarded.

I've never used it under Windows - I doubt it's as useful (not being able to take advantage of "Preview", widgets) and it's a bit slower.

What I miss in both Chrome and Safari is the universal mouse scroll...I used to literally abuse that feature in Firefox.
