Normally when you make a claim like that, you follow it by explaining how I've missed the point. Care to explain?

It shows that there are in fact negative effects (in his view) when you pit female and male gamers together. By having a female as his partner, the likelihood of this is far greater as males outnumber females by a huge margin. I thought you were all about logic...I therefore assumed you might be capable of figuring this out of yourself. You probably opted to get snacks instead...the overweight kid that redefined the field of theory has to get his immense energy from somewhere.
