As you all know I'm going to be running a Hostage Mode Server with zunnie's Hostage Mode scripts, if you didn't now you know

Anyway i was wondering if someone could tell me how to make a script for my server so if you type !where or !rescue it gives you a pop up msg telling you where to take the hostage's, on each map.

Edit: also i would like to know how to add audio so when you join the game like in sp lock tells you to rescue the hostages.
