reborn wrote on Wed, 18 November 2009 00:27 If you have the source code to the hostage mode, then you could add it to that (assuming it is built on SSGM). However, you could also build it as a plugin, so that if zunnie ever creates an updated hostage mode, you do not have to re-add your own custom code.

we added it to ssgm but idk if it works yet i'm still try to get my server up and running so i can upload it to my friend to host it.

ty for the code it explains alot about it and zunnie showed me a teleport script for tanks with no one in them its nice to.. all this will work gr8 with my server.
