WOLspy isn't needed if you're using BRenBot 1.52, it has a gamespy broadcaster built in. not using BR just trying to find the installer for zunnie. because BR site is down don't know why

wolspy give me run time error 13 file mismatch

<http://brenbot.com/> is inactive because the owner is missing in action or something, I have no idea. <http://new.brenbot.com/> is now the currently used website.

I don't even know where to get WOLSpy let alone how to use it, so I can't help you there.
