Are the sniping servers relatively cheat free? I guess it's easier to get rid of the cheaters as it's a smaller group. One of the reasons I quit was because clanwars basically died and messing around on public servers became less fun with 10% RGHers ruining every slick shit you try to pull and going for MVP has always been too easy and boring.

Today's server side bots with scripts and all that shit catch most cheats, and those that do slip by from time to time are caught within the same game (too obvious now a days). This 'resurrection' of clanwars is actually working out, many games are played daily. Definitely needs more people though. Try goin' for MVP vs today's top players, you won't find it easy. Still lots of retards on pub aows though
