Subject: Fonts too big at 1900x1200

I just reinstalled Renegade on my Windows 7 system. I now have a 24inch monitor running at 1900x1200. Before, I had a 19inch running at 1024x748. The problem is that the fonts on the tool tips with the health bar for players and plants are way too big, so big that they obscure the health bar making it very hard to see. I tried to play with the font settings in stylemgr.ini, but no matter what settings I choose, it seems not to make any difference in the game.

Any advice?
