Even without a router, you should be OK with just Windows if you don't do dumb stuff online. If not, ZoneAlarm is a good free antivirus, but that's the only one I've used, and that was a while ago.

Ya lol, I have a link system router with a custom DD-wrt firmware and plus windows firewall, but I wanna be a lil more safe.

Windows Firewall = WIN.

(Yes, it's a little unexpected, but the built in firewall is better than most commercial firewalls.)  
Some reason, I find that hard to believe.
