I had only heard of the one for male (s\_a\_human) and one for female (s\_b\_human)... but now that I take a second look into my mixer I see 2 more s\_c\_human and s\_z\_human.

Anyone know more about what the others are for?

In the mean time I will try to export using the others including the female one just to see what happens.

Edit: lols, this what happen with s\_z\_human

wtf
