I guess it has something to do with some weapons being too powerful to have unlimited ammo.

For example if you have collected a lot of weapons then the most powerful one (like the PIC) will always be used and never run out of ammo. Therefore none of the other weapons will be used.

Atleast when our most powerful weapon runs out of ammo we will be switching to a different one.

On APB infantry have unlimited ammo but only have 1 weapon and there are no weapon drops.
