Them people dont spend there time hacking into random people computers.. You have nothing to worry about from 'script kiddies' that think they're hackers because they downloaded a 'hacking' program.

lol ya i have a friend who goes to these major conventions for hackers and he tells me how he knows how to hack and has a firewall better than anyone else the FBI called him up asking him about why its so strong, and how he hacked its friends pc and can see everything they are doing.....sometimes I wonder if its true or not

It sounds like he's full of shit, but even if he isn't, that's still no reason to worry too much. Someone would have to really want to get into your computer.
