Hey guys,

we are currently looking for someone who wants to help with the Renegade section of Game-Maps.

There have been numerous releases of new skins mostly and some other files under the Mod Releases forum over here.

I am myself working on our UT/UT2004/UT3 section so i dont have time to do the Renegade section as well.

I was wondering if there is anyone with some basic FTP and very basic HTML <a> knowledge who would like to help out.

What you will be doing is simple:

You download the skins, create a winrar installer for it, upload it to FTP, then you add the file to the database.

If you are interested in becoming a staff member then please send me a PM on the forums here, email me zunnie@mp-gaming.com or come on [irc.mp-gaming.com](irc://irc.mp-gaming.com) in channel #game-maps

Thanks, greetz zunnie
