bla bla, mr i ruined two maps better than field to fix field, which only works because of an extra rule i had to add to make sure nod didnt dominate easy. so how bout that vechile allignment bla bla mod, the one that completes pointfix but only goes to create another glitch that u then dont even tell people about until they find out themselves and try to blow their tank up 5 seconds after they get out only realise its indestructable?

u really didnt need to jump all over this, i cant resist the urge to post when the people patching the game are like, "wtf, changing the pointsystem doesnt change balence" but f00k this argument, the changes are almost all negative but theyre not worth the 4000 pages spent arguing over it.
