I lol'd ITS SNOWING? IN DECEMBER? IN COPENHAGEN? HOLY COW YOUVE GOT TO BE KIDDING ME CALL AL GORE HE WAS WRONG ALL THESE YEARS. asshat.

Glock~ wrote on Sat, 19 December 2009 18:41It's cold as shit in North Dakota right now. Global Warming must be real..

/sarcasm
same goes for you.

Here in Missouri though there has been an obvious change in climate and weather. Also, the sun is entering it's high-activity cycle so it's probably not because of humans. That's what this documentary was talking about, so don't take what I said necessarily as fact. so the fact that the sun enters its high-activity cycle right now (which it isnt) explains the temperature increase of the last decades retroactively! how neat!
