It's true. It's not our fault. It's going to happen. Get over it.wow, sure, JUST IGNORE ALL THE EVIDENCE THAT ITS ANTHROPOLOGICAL. you stupid fuckface.  
Humans ASSIST in it because of all the emissions we put out. But if Humans did not exist on this planet, then it would still happen anyway.

It is not our fault, we are only speeding it up.

the earth will eventually go into another ice age. Earth gets hit with thousands of ice comets every day increasing the water level to like an inch a year. Humans produce a ridiculous amount of harmful emissions and garbage. Humans should be more worried about the garbage we produce than the emissions we put in the atmosphere.
