Renegade Spawner = F8->team2 <playerID> <teamID>   the team ID for renegade spawner is -1
Make "Renegade Spawners" around the map and code a script for your self making it so when a person join a server, the server gets its player id and then sends "team2 <playerID> -1" to the console thingy. It changes the team of the player to the id of -1 and then the player will spawn in random positions. The player will come up as blue in radar   Good luck.
