Glock~ wrote on Tue, 29 December 2009 12:55I was wondering about the Logitech X-540 Surround Sound System. I did some research and these seem to be some kick ass speakers for my laptop.

Now, all I have is the green audio output, so I was wondering if I would be able to hook these up. I have a head phone jack to RCA adapter, so is that the only extra chord I need?

Thanks in advance.
