The hours should cover the US turning to midnight through the time zones. We created a "drinking game" mode on our bot a couple years ago that instructs you to take a shot (or a sip of your drink) whenever you:

- * Die
- * Your beacon is disarmed
- * Your team loses a building
- * You are in a vehicle that gets destroyed
- * (probably more things I can't remember)

And of course everyone gets on TeamSpeak so you can hear your teammates descend into drunken messes.
