TaximesJavaxcx"Shutup" is not a word, champ. You can look at it any way you want to, it still doesn't exist.

Originally, "tomorrow" was "to morrow", as well as "yesterday" was "yester day".

Who knows, but the year 2100, it might be "Shutup"

Perhaps it will. It would allow the braindead spawn of the future to lazily justify their lack of pressing that big white bar at the bottom of the keyboard.
