Yep same to me, Comcast screwed up mine real bad... I used to get pings in the 30's on some servers! I cant find a server under 300 now a days... As soon as they took over my pings skyrocketed and stayed there... I miss the good ol days owning Devinoch's House with a ping of 50... Sniff... Now I can't even slightly own say... Beacon Pedastal with a ping of 300... how depressing... Curse you Comcast!!!!!!!!!! CUUUUUUUUUUUUUUUURSE YOU!!!!!!!!!!!!!! \*Dramatic Zoom Out Panning Upwards\*
