Subject: Re: saberhawk's Stealth effect
Posted by Omar007 on Tue, 12 Jan 2010 20:40:52 GMT

Sorry for the double post but this is an update on adding it through scripts.dll
First it wasnt really through scripts.dll, it was with HUD.ini

1. Adding it seems successful; Titlebar changes
2. Our goal is not reached; Stealth Effect didnt change :V

So it isnt that easy

UPDATE:
I added some files from the apb always.dat which works partially.

Toggle Spoiler

So it kinda gets stuck at the white part
It should go transparent on stealth and completely gone on unstealth but it doesnt
