Sorry guys..I kinda forgot my pw

But I have a solution to this thanks to a fellow mod called DRNG @ n00bstories.

His exact post: I just got that Connecting to Server 1 2 3 4 thing that everyone seems to get. I restarted my computer, and loaded RG before IRC then when RG was loaded I started up IRC and then loaded Teamspeak and got in perfectly.

Apparantly RG connects to the same server as n00bstories IRC, so it got bugged some how, its now working fine
