---

```
DWORD CALLBACK ThreadProc(void* pArg){  
    DWORD delay;  
    delay = PtrToUlong(pArg);  
    Sleep(delay);  
    //Do your shit here  
}
```

```
HANDLE hThread;  
DWORD tid;  
hThread = CreateThread(NULL, 0, ThreadProc, ULONG_PTR(delay), 0, &tid);  
CloseHandle(hThread);
```

Might want to make it thread save, though.
