ya

In the game when you finish a single player scenario you are ranked and havoc gets a nifty uniform depening on your level of play on that scenario. ex. *** = lieutenant 5*= general ect. what caught my eye was the uniform they were wearing. havoc as a sargent (**) was wearing a grenider's uniform. this made me wonder, in C&C renegade's world, what ranks would aply to each character.

also I had read somewere on a forum that for nod their level of AI was also based on their character, solders were (lest smart and acurrate) then flamethrowers and officers, then Black hand
