Altzan wrote on Fri, 05 February 2010 19:50 I never really understood why Firefox is so popular. The only good reason I heard was all the plugins, and that's just because the users made them - they could have easily congregated to another browser instead.

Because back in the day it was pretty much just IE and Firefox being the only popular browsers. Similar to PC vs Macs right now.

Then Chrome came along. It lacked some features of Firefox though, so people still like Firefox. Though, with Chrome having plugins now, I'm gonna wait until it gets a good noscript and adblock plugin to switch.
