Oh, shit. Ugh, I really hope I don't fuck it up. I'll definitely take it as slow as possible. I got a pretty big table that I should be able to lay all the parts out.

Fuck, I forgot all about a CD drive lol! Which one would support 64-bit? I found one, but it didn't support 64-bit as said in a review, so what should I get?

Also I need this version of Windows 7 right, not the upgrade?
