Reinstall it and try again. TFD wouldn't let you install the game if you put the incorrect serial number in, but that doesn't mean a problem couldn't have occurred.

Use the launcher to uninstall the game. Then reinstall it again.

The best way to put these codes in, imo, is to say the set out loud, which would be like 4 or 5 characters) and then repeat it again while typing it in.

So if the first set was like HJ49V, then read it out loud and repeat it as you type it in again "H-J-4-9-V." That way you insure you get it right. Then when you finish, just double check the code once though.

Also, I'm not sure but do they put "0"s and "O"s in? What about "I"s and "L"s? Those are the characters you need to look out for because they can get confusing.
