Altzan wrote on Sat, 13 February 2010 21:43What kind of mp3 player is it?
How exactly is he trying to connect it to a computer?
I'm having a hard time understanding your post, sorry...
no problem im bad at describing things hes trying to connect the mp3 to the computer through a usb cord to add more music on it. It is not detected on the computer. the mp3 acts like it normally would when connected to a computer.

the model is this:
