Last night i got force RG'd from there, i dunno if this is the right place to post but what is up with that? I thought renguard didnt work for shit? Only caused problems like random crashing.. yeah, so uhh.. unforge RG iamrakton if u can be assed I dont want to make an account for n00bstories forums or w/e

Its the only server that stays active late US nights, and thats bullshit that you let your mods kick me for not having renguard
