I'm still testing a few CD's but would like to know if anyone knows what is wrong. If the .ISO Files i am using are messing it up i would like to know, and they are LEGAL they were released for CC Red Alert and CC Dawn. it is reading the CD but not activating the start up file(Autorun/Automenu) I'm just curios why this happens. It has happened with every comp I've ever had within the first 2 years.
