Oh dear. I feel retarded. I totally forgot to plug the cables from my computer into my sub (the central hub for all the speakers). I looked back there and the plugs were dangling right out the back. LOL! At least there was nothing wrong with it.

And, without further a adieu, I give pictures, glorious pictures!

As you can see, I'm not quite up to speed in cable management, but everything is mostly clear of the hardware. I accidentally took out the noise dampeners (didn't realize what they were at the time lol.) out of where the SSD is currently sitting. I need to get them back one of these days lol.
