C:\Westwood\Renegade\Data\..

C:\Program Files\Westwood\Renegade\Data\..

C:\Program Files\EA Games\The First Decade\Command and Conquer(tm) Renegade\Data\..

You put the skins into the data folder here, depending on what renegade you're using. To find out what renegade you're using (and where it is located), right click the shortcut (either on the desktop, or in the start menu) and select Properties. In the Shortcut tab, you should have a Target box and a Start in box. The Target will show you exactly where the file this shortcut is located, and the Start In box usually contains the folder that file is contained in. Install the skin packs into the data folder which this shortcut is referencing to.

i think skins for The First Decade version will never work, there is no attack bike in my Renegade, which means the skins are for some other kind of Renegade:(
