Thanks for being patient and answering my questions. I'm just a little pissed I spent \$20 for a serial so I could play online and I still can't.

Some of the serials work, but not all of them work online. That's why it's so f\*\* lame by EA to do that, but oh well. Best way to get a valid serial is finding your old one, or buy a old copy of the game, as I linked you

you could also see in your regedit if your serial is added there, if it is, the serial is invalid, if not, enter it, and it might work
