Just found that exe on a site..... it's so obvious Crimson didn't make it.

- 1) She wouldn't insult herself, Blazer or DJLaptop like that.
- 2) If Crimson were to make an app I would say it would be made to a dam better quality than that sloppy peice of shite.
- 3) As Crimson said she wouldn't put her phone numbers on.
- 4) It's so damn similar to the Deathadder aimbot which we know Blazer did not create, even though the name suggests so.

Someone must seriously have a grudge against n00bstories, I am guessing whoever is responsible fro attacking the site probably made these apps aswell.
